FRONT

— Safe Line

All critical elements must be kept inside the blue box.

— Trim Line

This is where the product will be cut. We do not recommend having borders due to shifting during the cutting process. This can make borders look uneven.

Bleed Zone

Make sure to extend background images all the way to the edge.

Size with Bleed: 2.125" x 7.125"

Final Size: 2" x 7"

Important:

When designing the backside, remember the left and right holes will be reversed.
