**FRONT**

**— Safe Line**

All critical elements must be kept inside the blue box.

**— Trim Line**

This is where the product will be cut. We do not recommend having borders due to shifting during the cutting process. This can make borders look uneven.

**Bleed Zone**

Make sure to extend background images all the way to the edge.

**Size with Bleed:** 2.125" x 8.125"

**Final Size:** 2" x 8"

**Important:**

When designing the backside, remember the left and right holes will be reversed.
