

Simulates adhesive seal placement

— **Safe Line**

All critical elements must be kept inside the blue box.

— **Trim Line**

This is where the product will be cut. We do not recommend having borders due to shifting during the cutting process. This can make borders look uneven.

— **Bleed Zone**

Make sure to extend background images all the way to the edge.

Size with Bleed: 9.625" x 2.125"

Final Size: 9.5" x 2"

This is the approximate area that will be visible when wrapped around shirt

2.75"

9½" X 2" T-SHIRT BAND

Resolution: 300 DPI

Color Mode: CMYK (coated GRACo1 2006)

OVERLAP AREA

Keep important text and images away from this area. It will be covered once the band is wrapped around the shirt.
If you have a background color or image, it should cover this area.
