

— **Safe Line**

All critical elements must be kept inside the blue box.

— **Trim Line**

This is where the product will be cut. We do not recommend having borders due to shifting during the cutting process. This can make borders look uneven.

**Bleed Zone**

Make sure to extend background images all the way to the edge.

**Print Area with Bleed: 12.1" x 4.1"**

**Folded Size: 4" x 6" x 2.5" (bottom portion not shown)**
